Forecast for Monday 12 Jul 2021

Weather: A cloudy and misty start to Monday with outbreaks of rain probably heavy at times. These conditions not changing through the morning. Cloud thinning and breaking through the afternoon with further showers likely, possibly heavy and perhaps thundery but a drying trend is likely later with some bright or sunny spells by evening. Some mist and fog is likely to develop after dusk with cloud bases lowering. Winds mostly light throughout and blowing from the NE.

Chance of cloud free mountain/hill tops above 600m: Nil to start the day with overcast bases 200-300m, becoming 70% by mid to late afternoon as cloud bases become broken and lift to 800m. 20% after dusk with overcast bases lowering to 300-400m.

Visibility: Poor or very poor in the morning, becoming moderate or good in the afternoon, then probably poor again in evening mist and very poor across most summits.

14:00 on Sun 11 Jul 2021	0.4mm	3mm	3mm

Forecast for Tuesday 13 Jul 2021

Weather: A drier, warmer day is likely with early low cloud and mist clearing quite quickly in the morning. The best of the bright or sunny spells are most likely in the afternoon, along with a risk of a few showers which could give temporary lower cloud bases. Sunshine may be strong with UV protection recommended.

Maximum wind: North or NW 15-20mph.

Chance of cloud free mountain/hill tops above 600m: 20% with broken to overcast bases around 300m, becoming 90% by afternoon with scattered to broken bases 800m.

Visibility: Poor or very poor in early hours becoming good or very good by late morning, but moderate in any afternoon showers.

Temperature: **Valleys:** Plus 12 degrees Celsius becoming plus 22 degrees Celsius by afternoon.
At 600m: Plus 10 degrees Celsius becoming plus 17 degrees Celsius by afternoon.
Freezing level: Well above summits.
